

Joel Acedo
Developer

I am computer engineering student, interested in mobile and full stack web development, as well as other topics such as online marketing.

I am very self-motivated to start working on new challenges in a professional environment, and carry out interesting projects with the latest technologies of the market to continue improving a little more each day.

Work experience

iOS Developer - HELM S.C.P.
[MAR 2017 - Present](#)

Projects

The Movie DB - Android App

[FEB - 2017](#)

An application for android that displays information about the popular movies from The Movie Database. The app is designed with a clean architecture approach and using libraries or patterns widely used in the sector as they are: Dagger2, Retrofit2, Renderer pattern and Realm DB.

Personal business card - Design

[NOV - 2016](#)

Personal bussines card design. A minimalist design with the contact details and the name on the front, while on the back side we find a QR code that redirects to this web page. Available in two colors, blue and orange.

Takitea - Android App

[JUN - 2016](#)

This application allows the client to manage the ticket sales of a theater. The user can publish new theater plays with their respective sessions, also allows the client to buy tickets, selecting the session, the seats and the desired type of tickets.
